

hi-Earphones are designed with a minimal style to provide a perfect audio quality and to guarantee the maximum comfort of use thanks to their flat cables.

hi-Earphones are designed to combine quality, innovative technology and convenience in a pair of headphones. The sound is crisp and clear, perfectly isolated from outside noises even when the volume is low. The BBS (Bass Boos System) improves audio quality enhancing the basses and letting you listen to your tracks and making phone calls in any environment. Shuffle button and microphone are integrated into the controller so as to be able to select music tracks and manage phone calls in a "hands free" way. Moreover the flat shape of cables eliminates knots each time you put them away after use.

Specifications:
