

hi-George is the puppy of the hi-Fun family: cute and soft like a stuffed animal, it hugs your mp3 player or smartphone and spreads music from the speakers built into its paws.

hi-George is a lovely teddy bear that looks like a common stuffed animal, but in reality it is a real portable music speaker! We have hidden two integrated speakers into its paws that spread the music stored in your media player (smartphone, mp3 player...) while hi-George is hugging it. You can connect any devices equipped with a universal 3.5mm jack input and power your bear with two simple AA batteries.
